Jill

Best value spray cap in the market

Jill

Best value spray cap in the market

Jill has an exclusive appearance and is perfectly suitable for Personal Care applications, such as deodorants and hair sprays. The **Integrated Spray technology** offers flexibility to handle various formulations and to obtain different spray patterns, depending on the required effect. The compact and integrated design guarantees an economical choice.

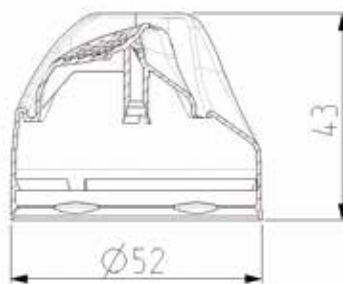

Spray cap Jill has a high gloss surface finish that complements the stylish look. Also translucent materials, metallic or pearl effects give the cap a glamorous image. This horizontal spray cap has a clearly marked finger recess area that offers a light and convenient actuation of the spray, supported by the solid hinge that is situated on the push side. The fixed and flared stem fit offers the advantage of easy positioning during assembly. The polypropylene spray cap exists of only one piece and is manufactured in one single moulding shot. This makes the manufacturing process simple and efficient, while the Jill can be recycled easily.

Integrated Spray Technology

WP developed a proprietary spray solution with a patented technique, integrating both the actuator and insert. The spray orifice of the button is positioned just above the stem to optimise the control and performance when activating the aerosol. A special chamber and channel design stimulate the acceleration of particles into a swirling pattern. The spray performance can be fine tuned without any risk of clogging.

translucent

Unique Benefits

- One-piece
- Cost competitive
- Attractive and ergonomic design
- Good functionality
- User-friendly
- Flexibility in flows, stem fits and colours
- Different spray patterns feasible
- No clogging
- Recyclable as one part

Specifications

- Diameter 52 mm
- Height 43 mm
- Fits on necked-in tin plate cans and aluminium transfer cans
- Designed for all common valve dimensions
- Horizontal spray
- Gloss surface finish
- Appropriate for translucent and solid colours
- Suitable for Personal Care applications
- Material PP
