MaxiDose 29/21 snap-on

Adding value by valve solutions

MaxiDose 29/21 snap-on

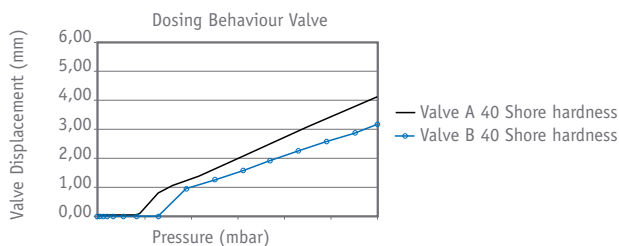

Adding value by valve solutions

To meet the market demand Plasticum developed a multifunctional dispensing closure for PET and glass bottles. It is a one-piece flip-top closure with different orifice types, including valve and flow blades, to pour all kinds of applications. Every version guarantees an easy and controlled dispensing.

Thanks to the PP material, a high gloss surface finish can be obtained. This gives the closure an appealing and distinctive look. The MaxiDose 29/21 has a snap-on application and an outer tamper evident function. This tear-off strip proves first use and can be easily removed.

The valve version is fitted with the **MaxiDose technology**, a patented valve technique developed by Plasticum. The valve ensures a clean dispensing of the quantity that the consumer actually wants.

MaxiDose technology

Plasticum developed a proprietary silicone valve solution with a patented technique. The silicone material has a memory for long term seal quality and the opening/closing mechanism. Good temperature resistance is another advantage to give excellent dispensing opportunities for a wide range of viscosities and product applications.

Unique Benefits

- Cost-effective solution
- Continuously controlled dispensing
- Optimised functionality
- Easy to open
- Visual tamper evident function
- Valve and non-valve orifices available
- Suitable for many different viscosities
- Wide array of bottle geometries possible

Specifications

- Outside dimension: 30.8 mm
- Neck finish: 29/21 snap-on
- Suitable for PET bottles
- Orifices: 6 mm, 10 mm and valve
- Valve diameter: 11 mm
- Heights: 20.4 mm
- Tamper evident function
- Material PP
- High gloss surface finish
- Almost infinite range of colours
- Suitable for several product applications
