When safety and convenience are paramount

# Premium-Line

## When safety and convenience are paramount

Relying on decades of knowledge and experience about consumer-product interaction, market trends, and legislation, Weener Plastics (WP) has developed a sustainable standard hinged lid with integrated scoop for infant formula: the Premium-Line. No concessions. It offers everything you need!

### Safety & Hygiene

The robust Premium-Line offers a superb user experience and ultimate product safety. The patented Tamper-Evident tab ensures first use and doesn't result in any loose parts, thus meeting future legal requirements. The reclosable safety clip closes comfortably with an audible click for tight and secure sealing. To further enhance hygienic usage, the scoop is stored on the cover ring.

The products are produced in an HACCP approved factory, with ISCC Plus mass balance certification.

### Convenience

The safety clip remains attached to the lid, making it easy to open and close. The scoop can be easily and conveniently picked up and replaced with one hand. A wide handle ensures perfect grip and stability while precisely dosing the powder quantity. Venting slits enhance accurate and controlled scooping. Thanks to its secure fixing on bridges, the scoop remains in place when the lid is closed. These bridges have a dual function, and also act as levelling device.

The cover ring has a foldable rim on the inside for an optimal can-lid interaction that doesn't require great force, facilitating pre-centered, efficient capping.

### Sustainability

In addition to offering safety and convenience, the Premium-Line meets all of today's sustainability requirements. It is lightweight yet solid, uses mono-material polypropylene (PP) and can also be provided in bio-based or chemically recycled material based on the mass-balance approach.

Premium-Line lids and scoops are produced in HACCP-approved factories. The products made bio-based PP or chemically recycled PP are produced under ISCC Plus certification.

### Unique Benefits

- Premium appearance
- Optimal user convenience
- Convenient scoop docking
- Lightweight and sustainable
- Stackable lid-on-lid and lid-on-can
- Anticipating on future legislation
- Customization possible

### Specifications

- Diameter 127 mm
- For standard tinplate cans
- Integrated Tamper-Evident feature
- Foldable rim
- Combination of gloss and matt surface
- Food approved PP, bio-based PP or chemically recycled PP
- Option for in-mould Label

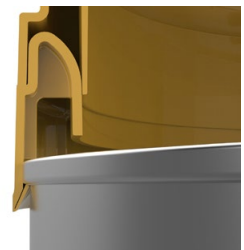

*Unique Tamper-Evident tab*

*Robust safety clip*

*Convenient scoop docking*

*Foldable rim for optimal can-lid interaction*
